There are risks involved with investing in ETFs, including the risk of error in replicating the underlying Index and possible loss of money. Units are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Please read the prospectus for a complete description of risks relevant to the ETF. Ordinary brokerage commissions apply to purchases and sales of ETF units.

Each PowerShares ETF seeks to replicate, before fees and expenses, the performance of the applicable Index and is not actively managed. This means that the Sub-advisor will not attempt to take defensive positions in declining markets but rather continue to hold each of the securities in the Index regardless of whether the financial condition of one or more issuers of securities if the Index deteriorates.

ETFs are not diversified investments.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

¹Canadian Securities Administrators' National Instrument 81-102 Mutual Funds does not permit the publication of performance history until an ETF is one year old. As such, Market price and NAV performance will be shown after the ETF has one year of performance history.

²An investor cannot invest directly in an index. The results assume that no cash was added to or assets withdrawn from the Index. Index returns do not represent ETF returns. The Index does not charge management fees or brokerage or other expenses.

³Quoted ETF yields should not be construed as an amount an investor would receive from the ETF and are subject to change.
