

XSE

iShares Conservative Strategic Fixed Income ETF

As of 06/30/2016

iShares[®]
by **BLACKROCK**[®]

The fund seeks to generate income for unitholders by investing primarily in securities of one or more exchange-traded funds managed by BlackRock or an affiliate that provide exposure to Canadian and international fixed income securities, including government bonds, investment grade corporate bonds, high yield securities, emerging market debt and other types of fixed income investments, while adhering to certain portfolio constraints upon rebalancing. In seeking to generate income, XSE will, upon rebalancing, generally limit its total exposure to high yield securities to 25% of its portfolio.

KEY BENEFITS

- 1 XSE seeks higher yields and has the flexibility to invest in a range of bond maturities without any duration constraints
- 2 Seeks to keep overall portfolio risk in line with the broad Canadian bond market
- 3 Access a variety of Canadian and CAD-hedged global fixed income exposures while limiting non-investment grade credit exposure

KEY FACTS

iShares® Funds are managed by BlackRock Asset Management Canada Limited ("BlackRock Canada"). Commissions, trailing commissions, management fees and expenses all may be associated with investing in iShares Funds. Please read the relevant prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or operational charges or income taxes payable by any securityholder that would have reduced returns. The funds are not guaranteed, their values change frequently and past performance may not be repeated. Tax, investment and all other decisions should be made, as appropriate, only with guidance from a qualified professional.

The above results are hypothetical and are intended for illustrative purposes only. The Hypothetical Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses, were deducted.

Unlike an actual performance record, hypothetical results do not represent actual performance and are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk. There are frequently differences, including material differences, between hypothetical performance results and the actual results subsequently achieved by any particular fund. Since trades have not actually been executed, hypothetical results cannot account for the impact of certain market risks such as lack of liquidity. There are numerous other factors related to the markets in general or the implementation of any specific investment strategy, which cannot be fully accounted for in the preparation of hypothetical results and all of which can adversely affect actual results.
