Portfolio Strategy

The BMO Equal Weight US Health Care Hedged to CAD Index ETF has been designed to replicate, to the extent possible, the performance of the Solactive Equal Weight US Health Care Index Canadian Dollar Hedged, net of expenses. The Fund invests in and holds the Constituent Securities of the Index in the same proportion as they are reflected in the Index. The US dollar exposure is hedged back to Canadian dollars.

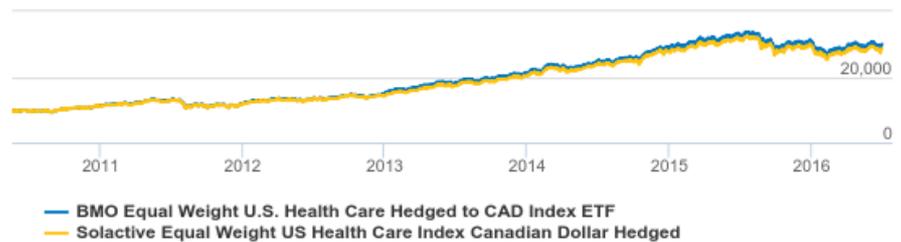

Benchmark Info

The Solactive Equal Weight US Health Care Index Canadian Dollar Hedged consists of the securities of companies that fall within the Health Care supersector of the Industry Classification Benchmark. To be included as a Constituent Security, an issue must meet certain minimum trading volume requirements and be incorporated in, or has its primary market listing in the United States. The U.S. dollar exposure is hedged back to Canadian dollars.

Fund Benefits

- Designed for investors looking for growth solutions
- Exposure to U.S. healthcare stocks
- Equal weighted to lessen security specific risk
- Currency is hedged to mitigate currency impacts
- Professionally managed by BMO Global Asset Management

Commissions, management fees and expenses all may be associated with investments in exchange traded funds. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns including changes in prices and reinvestment of all distributions and do not take into account commission charges or income taxes payable by any unitholder that would have reduced returns. Exchange traded funds are not guaranteed, their values change frequently and past performance may not be repeated.

² Beta is a measure of how a BMO ETF responds to moves in the broader market in which it invests. A beta of greater than 1.00 suggests that the ETF is more volatile than the market, while a beta of less than 1.00 suggests that the ETF is less volatile than the market. Beta may change over time and historical beta is not indicative of future beta. The indicated beta is generally based on historical rolling two-year returns. Where a BMO ETF does not have two years of performance history, the beta may be calculated as long as at least six months of performance history is available.
